

4-core FOB Fiber Optic Fast Connector

Article Overview

A 4-core FOB fiber optic fast connector is a quick-install, high-density connector designed for multi-fiber applications, offering low insertion loss, high return loss, and tool-less termination for enterprise, FTTH, and data center networks.

Overview

A 4-core FOB (Fiber Optic Breakout) fast connector is a pre-polished, plug-and-play connector that allows rapid termination of four optical fibers simultaneously. It is designed for high-density environments where space is limited, such as data centers, LANs, and FTTH deployments. These connectors typically feature a push-pull or push-fit mechanism, enabling installation in under a minute without specialized tools or hand polishing .

Key Features

- **Fiber Compatibility:** Supports single-mode (G652D, G657A1/A2) and multimode fibers, compatible with 250 μm and 900 μm fibers, as well as 0.9 mm, 2 mm, and 3 mm cordage .
- **Ferrule Technology:** Uses zirconia ceramic ferrules with high concentricity ($\leq 0.5 \mu\text{m}$) to ensure precise fiber alignment, low insertion loss ($\leq 0.3 \text{ dB}$), and high return loss ($\geq 50 \text{ dB}$ for APC), .
- **Housing and Density:** Compact, miniaturized design allows high-density connections, often half the size of standard SC connectors, suitable for space-constrained installations .
- **Durability:** Stable connections with excellent shock resistance, suitable for repeat...
