

576-core fiber optic tray

Overview

The 576 core dome joint closure is a mechanical sealing design with one oval port cable entry and eight round port outlets. It is a great solution for distributing, splicing and storing outdoor optical cables. The compact N600D-0576-6 is ideal for singlemode and multimode fiber infrastructure in. 576 core outdoor waterproof dome optical fiber junction box wall/pole mounting has 16 circular cable entry hole and one oval hole, adopt the heat shrinkable seal, Can be used for aerial, pole and wall mounting; Good sealing performance, simple installation, it is the best option for the optical. FOSC-GJS-D319 Heat-shrinkable Dome Optical Fiber Splice Enclosure can be used as joint box to protect fiber splice connection of fiber cables, and as branch application for cables of bunchy fiber and ribbon fiber. The integrated optical fiber fusion module integrates adapter. Fiberlink's Fiber Optic Splice Closure (FOSC) are made of high density reinforced PC material. Fiberlink's Fiber Optic Splice Closures are suitable for protecting. SJ-ODF-03 576 cores ODF fiber optic provides a pre-terminated, pre-configured and reliable optical solution for the most critical applications in electrical power generation, industrial automation and control systems.
