

Ale distribution box installation

Article Overview

Installing an ALE distribution box involves setting up ALE services, configuring distribution units, and ensuring proper IDoc communication between SAP systems.

Step 1: Install ALE Software

Begin by installing the ALE software on a virtual machine or bare-metal server. Depending on your version, follow the specific installation instructions for ALE 2.0, 2.1, or 2.2. After installation, ensure the ALE services are activated on your network and the system is reachable via the WebUI for configuration ().

Step 2: Launch the ALE Setup Wizard

Once installed, launch the ALE WebUI using your login credentials. The ALE Setup Wizard will automatically start for a factory-default system. This wizard guides you through configuring system settings, including network parameters, user access, and default packet handling ().

Step 3: Configure ALE Distribution Units

Use the ALE Distribution Cockpit to manage distribution packets and units. Here you can:

- Select ALE distribution units for inbound or outbound processing.
- Check the status of packets (e.g., errors, partially posted, or successfully posted).
- Postprocess packets and IDocs to resolve errors....
