

Approximate price of single-mode fiber optic patch cord

Article Overview

Single-mode fiber optic patch cords typically range from \$5 to \$30 per unit, depending on length, connector type, and quality.

Pricing Overview

The cost of a single-mode fiber optic patch cord depends on several factors:

- Length: Shorter cords (1-3 meters) are generally less expensive, while longer cords (10-30 meters) increase in price linearly.
- Connector Type: LC, SC, ST, or MPO connectors affect cost, with precision-polished connectors or multi-fiber MPO/MTP types being more expensive.
- Jacket Material: LSZH (Low Smoke Zero Halogen) or armored cables designed for harsh environments carry higher prices.
- Quality and Testing: Cords that meet strict standards, include IL/RL test results, or come with end-face inspection reports are priced higher. For example, a 3-meter LC-LC OS2 single-mode patch cord can cost around \$5-\$15 for standard retail purchases, while custom or bulk OEM orders may range from \$10-\$30 per unit depending on setup costs and labeling requirements .

Regional and Market Considerations

- United States: UL-listed or ETL-verified cords with individual test reports are common, often increasing unit cost....
