

Authentic Vietnamese electrical distribution box

Article Overview

Vietnamese electrical distribution boxes are essential components for safely distributing electricity in residential, commercial, and industrial settings, with multiple certified manufacturers and suppliers available locally.

Overview

Electrical distribution boxes in Vietnam are used to connect, distribute, and isolate electricity for buildings, factories, and solar or hot water systems, ensuring safety for users and equipment. They house switchgear, control devices, and protective equipment and are designed to meet standards such as TCVN 7994-1:2009 (IEC 60439-1:2004), ISO 9001, and ISO 14001 for quality and environmental management (IREX) .

Types and Applications

- **Standard Distribution Boxes:** For general electrical distribution in residential and commercial buildings.
- **Solar Power Distribution Boxes:** Connect electricity from solar inverters to the grid or storage systems, supporting batteries like lead-acid or lithium .
- **Solar Water Heater Distribution Boxes:** Control and monitor pumps, valves, and heating elements in hot water systems .
- **Industrial Metal Enclosures and MCB Panels:** Used in factories for robust power distribution and protection against dust and water (IP65 rated) ...
