

# Bus trunking connector price

## Article Overview

Bus trunking connectors typically range from ₹300 per meter to over \$1,000 per unit, depending on type, material, and current rating.

### Price Overview

The cost of bus trunking connectors varies widely based on material, size, current-carrying capacity, and system type. For example:

- Affordable options in India start at around ₹300 per meter (Misty And Company) and ₹1,000 per piece (Jans Electromate) for standard busbar trunking systems .
- Higher-end systems with copper conductors, advanced insulation, or heavy-duty industrial ratings can cost \$50-\$1,000 per unit internationally, depending on amperage and customization .

### Factors Affecting Cost

- Material: Copper connectors offer superior conductivity but are more expensive than aluminum, which is lighter and more cost-effective .
- Current Rating: Systems range from 400A to 6300A, with higher amperage connectors costing more due to thicker conductors and enhanced thermal resistance .
- Type of Busbar Trunking:
  - Compact air-insulated systems for medium-duty applications are generally cheaper.
  - Heavy-duty or arc-resistant systems for industrial or critical infrastructure are more expensive ....
