

CAD Statistical Optical Cable Plugin

Overview

Import KML files, match addresses, place terminals, and manage fiber optic networks directly in AutoCAD. 20+ powerful features built specifically for fiber optic cable installations Layout Extraction (NEW!) Extract parcel lines, roads, house numbers from public GIS. ITS-NetDesign™ is our Autocad (Map3D) add-on dedicated to creating high-level and installer-ready, low-level, FTTH network designs. ITS-NetDesign™ creates all required labeling, BoQ, BoM, optical fiber and duct & cable schematics. As an option it uses the ITS-NetOptimus™ algorithms to enhance. This Tool helps the user create cables over existing cable trays (From the Host or Linked Model) as "conduits" with all required parameters. Additionally, it can facilitate the cab. This Tech nical Note discusses how to do so using data sheets commonly supplied by Alcoa Fujicura Ltd. This app provides several commands to draw the Catenary curve in Autodesk® AutoCAD® utilizing different input parameters Toggle instant presentation. Schneider Electric Ireland.
