

Cable tray bridging price

Article Overview

Cable tray bridges typically range from \$0.80 to \$76 per unit depending on material, size, and supplier, with bulk orders offering lower per-unit costs.

Price Overview

Cable tray bridges are available in various materials such as hot-dipped galvanized steel, aluminum, and fire-resistant FRP, which significantly influence the price. For small-scale or consumer purchases, prices generally range from \$15 to \$34 per unit, while wholesale or B2B bulk orders can start as low as \$0.80 per unit and go up to \$76 depending on specifications. High-quality, durable options suitable for industrial applications command higher prices due to material strength and compliance with safety standards.

Factors Affecting Cost

- **Material Type:** Stainless steel and fireproof materials are more expensive than standard galvanized steel or aluminum.
- **Span and Size:** Larger spans or wider trays require more material and structural support, increasing cost.
- **Design and Features:** Ladder-type, perforated, or mesh cable bridges with predrilled mounting holes or specialized clips may cost more due to ease of installation and cable management features.
- **Quantity and Supplier:** Bulk orders reduce per-unit cost, especially from B2B suppliers like Alibaba, while small orders from B2C platforms are higher per unit.
- **Installation Considerations:** Some prices include mounting hardware or foundation provisions, while others may require additional accessories or labor
