

Cable tray fixing hanger

Article Overview

Cable tray hangers are used to securely suspend cable trays from ceilings or walls, ensuring proper support and alignment for safe cable management.

Types of Cable Tray Hangers

- **Threaded Rod Hangers:** Suspended from ceilings using M8 or M10 threaded rods, these hangers support horizontal runs of cable trays and allow height adjustment for alignment .
- **Wall-Mounted Brackets:** Fixed directly to walls via supporting flanges, these brackets provide lateral support for cable trays and are ideal for short runs or side-mounted installations .
- **Single Fixing Point Hangers:** Designed for overhead suspension, these hangers can be attached to threaded rods or directly to the ceiling, allowing side mounting of cables for easier installation .

Fixing Methods

- **Suspension from Threaded Rods:** Use M8 or M10 rods with appropriate nuts and washers. Hangers are attached to the rod, and the tray is then secured using clamps or couplers .
- **Direct Ceiling Fixing:** Some hangers allow direct attachment to the ceiling using screws or bolts. Ensure the ceiling material can support the load of the tray and cables .
- **Wall Bracket Fixing:** Brackets are mounted to walls using anchors or bolts. The tray is then placed on the bracket and secured with clamps or bolts
