

Classification of junction boxes

Article Overview

Junction boxes come in various types based on material, environment, and application, including metal, plastic, waterproof, explosion-proof, and high-voltage cable boxes.

By Material

Metal Junction Boxes: Made from steel, stainless steel, or aluminum, these boxes offer high mechanical strength, fire resistance, and grounding capabilities. They are ideal for industrial plants, factories, and outdoor installations where durability and safety are critical . Stainless steel 316L boxes are commonly used in chemical plants due to their corrosion resistance .

Plastic Junction Boxes: Constructed from PVC, ABS, or polycarbonate, these boxes are lightweight, corrosion-resistant, and cost-effective. They are suitable for residential wiring, light commercial use, and indoor applications where high impact resistance is not required .

By Environmental Rating

Waterproof/Outdoor Boxes: Rated IP65, IP66, or NEMA 4X, these boxes protect against water, dust, and UV exposure. They are used in solar energy systems, outdoor lighting, and HVAC units .

Explosion-Proof Boxes: Designed for hazardous environments, these boxes prevent sparks or arcs from igniting flammable atmospheres. They comply with ATEX, IECEx...
