

Complete List of Stainless Steel Cable Tray Specifications and Prices

Article Overview

Stainless steel cable trays are available in 304 and 316 grades, multiple widths from 50mm to 900mm, and various designs, with prices depending on material, size, and configuration.

Specifications

Material and Grades: Stainless steel cable trays are typically manufactured in 304 and 316 stainless steel, offering excellent corrosion resistance and durability for industrial, marine, offshore, and food processing applications . **Design Types:**

- Ladder-type trays: Ideal for heavy cable loads and long spans.
- Perforated trays: Provide ventilation and drainage for cables.
- Solid bottom trays: Suitable for sensitive cables requiring full protection .

Dimensions: Standard widths range from 50mm to 900mm, with depths and lengths varying to accommodate different cable loads and installation requirements .

Load Capacity and Durability: Stainless steel trays are engineered for light, medium, and heavy-duty applications, with precise load-bearing specifications, temperature resistance, and chemical compatibility for demanding environments . **Accessories and Configurations:** A full range of couplers, bends, tees, risers, and mounting brackets is available to configure cable routing systems efficiently . **Installation Options:** Trays can be mounted on floors, ceilings, or walls, and modular designs allow for easy sizing and adjustments . **Compliance:** Many trays are NEC-approved and conform to standards such as ASTM A123, ISO 1461, and NEMA VE 1-2017, ensuring safety and...
