

Cost Table for Communication Pole Steel Wire and Optical Cable

Article Overview

Typical costs for fiber optic deployment range from \$0.40-\$5 per foot for cable, \$800-\$175,000 per kilometer for poles, and \$1.50-\$8 per meter for ADSS on existing poles.

Estimated Cost Table

Component	Type / Specification	Unit Cost	Notes
Fiber Optic Cable	Single-mode, indoor	\$0.10-\$0.50 per foot	Lower-cost option for short indoor runs; OM3/OM4 multimode costs \$0.30-\$1.00 per foot
	Outdoor, armored	\$0.50-\$5 per foot	Suitable for direct burial or harsh environments; higher strand counts increase cost
Labor	Trenching, splicing, termination	\$1.00-\$3.00 per foot	Depends on distance, complexity, and region
Communication Poles	New telecom pole	\$15,000-\$175,000 per km	Includes pole-specific costs before hanging fiber; varies by rural/suburban density
ADSS on existing power poles		\$800-\$4,500 per pole	Make-ready costs only where needed; cable and hardware \$1.50-\$8 per meter installed
Steel Wire / Messenger Wire	Aerial support for fiber	Included in ADSS or separate	Typically part of aerial installation; cost varies with span and tension requirements
Permits & Accessories	Local approvals, connectors, delivery	\$100-\$900 per project	Depends on region, project size, and environmental conditions

Notes and Considerations

- Cable Type and Count: Higher strand counts and armored construction increase costs. Single-mode fiber is preferred for long-distance backbones, while multimode i...
