

Distribution Box Circuit Output Design Diagram

Overview

This AutoCAD DWG file includes a complete Single Line Diagram (SLD) of a Distribution Board, showing circuit breakers, wiring connections, and load distribution for lighting, power, and mechanical systems. Single-phase distribution boards are mostly used in domestic house wirings such as houses offices, shops, etc. In India, a 230V single-phase AC supply is used for domestic so here all the devices used. Our reference designs and integrated circuits enable innovation on performance and size, weight and power (SWaP) reduction in IFE monitors and other peripherals. Support for various sizes of high definition (HD) displays. Graphics processor. Main Switch (Isolator): Positioned at the top of the distribution board diagram, it provides “double pole” isolation, simultaneously breaking live and neutral conductors for safe maintenance. In this board, balance load is distributed as.
