

Do ladder-type cable trays come with covers

Article Overview

Ladder-type cable trays do not inherently require covers, but covers can be used optionally for environmental protection or safety.

Open Design Benefits

Ladder-type cable trays are designed with two side rails connected by rungs, providing maximum ventilation and heat dissipation for power cables. The open structure allows air to circulate freely, reducing the risk of overheating and minimizing dust accumulation compared to solid-bottom or ventilated trough trays . This design also prevents moisture from pooling and avoids the piping of hazardous gases, which can occur in conduit systems .

Optional Covers

While covers are not mandatory, they are available and can be installed for specific purposes:

- Environmental protection: Shields cables from UV radiation, snow, ice, or water ingress .
- Mechanical protection: Guards against vandalism or accidental contact in exposed areas .
- Special applications: May be used in outdoor installations or areas with high contamination risk . Covers are typically compatible with standard fittings like elbo...
