

Dominican Republic s fiber optic cable outage

Overview

Claro has now officially confirmed that the incident was caused by two separate fiber-optic cuts, one of which affected the operator's backup system — resulting in nationwide slow speeds, intermittent connectivity, and service instability. This graph shows additional details related to IODA's Active Probing measurements, including Round-Trip Time (RTT) Latency and the percentage of IODA's probe packets that did not get a response. The Internet Outages Map is an at-a-glance visualization of global Internet health over the last 24 hours, tracking Internet outages across ISPs, top application providers, public clouds, and edge service networks. This is a live broadcast of Internet statistics, as collected by Pingdom from users across the world. See how you can use Pingdom to monitor your website. The company added that. SANTO DOMINGO, Dominican Republic (AP) – A rare blackout hit the entire Dominican Republic on Tuesday, snarling traffic and paralyzing businesses in the country of nearly 11 million people.
