

Fiber Optic Cable Factory Cable Retrieval Worker

Article Overview

A Fiber Optic Cable Factory Cable Retrieval Worker handles raw materials, monitors production lines, retrieves and prepares fiber optic cables, and ensures quality and safety standards are met.

Key Responsibilities

Material Handling: Workers manage raw materials such as optical fibers, insulation, and sheathing materials. This includes cutting, stripping, and connecting components to meet specifications, ensuring the cables are ready for assembly and further processing . **Cable Retrieval and Production Line Monitoring:** Workers retrieve fiber optic cables from production lines, monitor automated machinery, and ensure that all components are properly connected. They check for defects and maintain smooth operation of the production line . **Testing and Quality Control:** After retrieval, cables are tested for optical transmission performance, physical strength, and appearance. Workers may perform inspections and report any issues to maintain high-quality standards . **Troubleshooting:** If production issues arise, workers identify and resolve problems quickly to prevent delays and maintain consistent output . **Safety Compliance:** Workers must follow strict safety protocols, including wearing helmets, gloves, goggles, and other personal protective equipment. Adherence to safe operating procedures is essential to protect themselves and colleagues .
