The Fiber Color Code, defined by the TIA-598 standard, establishes a universal system to identify fibers, connectors, and cables across global networks. By following it. Corning's invention of the first low-loss optical fiber ignited the critical spark that began a communications revolution that forever changed the world. Today, there are more than five billion kilometers of fiber cable installed around the globe, and Corning continues to lead the fiber optic cable. Tubes with 24 uniquely colored fibers: Fibers 1 to 12 use the standard blue through aqua color sequence.
