

Fiber optic cable suspension installation price

Article Overview

Aerial or suspended fiber optic cable installation typically costs between \$6.50 and \$12 per linear foot, with total project costs influenced by route complexity, labor, and permits.

Cost Breakdown

Materials: Fiber optic cable itself ranges from \$1 to \$6 per foot depending on fiber count and type, with single-mode fiber generally cheaper than multimode fiber . Pre-terminated assemblies or patch cables may increase material costs.

Labor and Installation: Labor accounts for 60-80% of total costs. For aerial installations, typical labor rates range from \$90 to \$120 per hour, with total labor hours depending on route length and complexity . A standard aerial installation can cost around \$6.55 to \$12 per foot, making it more cost-effective than underground methods .

Permits and Equipment: Permit fees vary from \$150 to \$2,500 per project, depending on municipal requirements. Equipment such as OTDR testers and certification tools may add 5-15% to the total cost .

Example Project Costs

- Small-scale aerial run: 2,000 ft of fiber, mixed terrain, one splice closure, testing included, total cost approximately \$15,000-\$22,000 .
- Medium-scale aerial deployment: 5,000 ft through urban areas with multiple splices and testing, total cost can reach \$60,000-\$110,000
