

Fiber optic distribution cabinet capacity

Overview

Customized size available upon request. Front and back access with locking feature. Pre-connectorized fiber pigtailed installed for rapid. A Fiber Distribution Cabinet is a modular enclosure that interfaces between feeder cables (high-capacity backbone fibers) and distribution cables (user-specific fibers), enabling seamless signal distribution and management. All cabinets feature intuitive fiber management and internal layout that minimize training time and optimize installer productivity. The KOFDS series fiber distribution cabinet is designed for both indoor and outdoor environments. It can support distribution of optical signal, optical fiber storage. Incorporating Clearfield's philosophy of modularity and flexibility, the FieldSmart[®] Fiber Distribution Hub (FDH) sets the bar for fiber access, protection and density among outside plant fiber cabinets for PON, cross-connect or hub collapse environments. Fiber Optic. Capacity up to 576 fiber.
