

Fire protection cable tray manufacturers

Article Overview

Leading manufacturers of fire protection cable trays include Flamro, JetBlack, Beerenberg, NewReach, and Meka, offering solutions for industrial, offshore, and high-rise applications.

Key Manufacturers and Their Solutions

Flamro provides fire protection coatings and tapes for cables and cable trays, such as FLAMMOTECT-A and DG-CR 0.7, which prevent flame propagation and maintain cable functionality during fires. Their solutions are suitable for indoor and outdoor use in sensitive areas like hospitals, airports, power stations, and nuclear facilities, and also protect against environmental factors like UV, moisture, and chemicals. JetBlack specializes in cable tray fire protection systems for high-risk environments, including petrochemical and offshore industries. Their certified blanket systems can withstand temperatures up to 1,268°C for two hours, even in jet fire scenarios, providing critical time for evacuation and fire-fighting. The systems are customizable, removable, and allow for regular inspection. Beerenberg offers the Benarx Epoxy Cable Tray, a prefabricated passive fire protection solution made of epoxy-coated perforated steel. It is designed for quick installation, mechanical durability, and long-term integrity, reducing maintenance costs compared to traditional ceramic fire protection. The system allows easy access to cables and can be reused. NewReach manufactures fire-rated cable trays in materials such as powder-coated aluminum, galvanized steel, and fiberglass with intumescent coatings. Their trays are tested to ISO 834-1, EN 1363-1, DIN 4102-12, and AS/NZS 3013:2005 standards, offering up to a 2-hour fire rating at 1,050°C. These trays support critical systems like emergency lighting and fire alarms while preventing flame spread. Meka produces fire-resistant cable supp...
