

Four-core multimode optical fiber cable pigtail

Overview

Multimode Pigtail (OM1, OM2, OM3, OM4): Has a larger core (62.5/125µm or 50/125µm) and is used for shorter distances within buildings or campuses. A 4-core multimode fiber cable pigtail is a critical component in structured cabling systems, used to connect optical fibers from a main cable to patch panels or network equipment. This. nications rooms, data centers and at the desk. Patch cords support network applications in main, horizontal and equipment distribution areas and are available in riser (OFNR), and low smoke zero halogen (LSZH) rated jacket mat nconnector ins 5dB max. They consist of a high quality 900um LSZH cable terminated with an optimized connector for low inserti n loss and low back reflection. They fully conform to IEC, Len Len Len Len Len Len Len Len Len.
