

German Antistatic Flooring Cable Tray Low-Temperature Resistance Installation Solution

Article Overview

A robust solution combines ESD/antistatic flooring with walkable, low-temperature-resistant cable trays, ensuring safety, durability, and flexible installation in industrial or sensitive electronic environments.

Antistatic and ESD Flooring

For environments sensitive to static electricity, such as electronics manufacturing, computer rooms, or operating theatres, antistatic or ESD flooring is essential. Options include static dissipative or static conductive vinyl and linoleum, which are highly resistant, easy to maintain, and suitable for high-traffic areas . These floors prevent electrostatic discharge that could damage microelectronics or trigger sparks, and they are compatible with low-temperature industrial conditions . Flooring systems can be color-coordinated and integrated with acoustic or compact ranges for additional functionality .

Walkable Cable Trays and Floor Trunking

For cable management, walkable floor trunking or cable trays provide a safe and flexible solution. Systems like PFLITSCH Floor Trunking feature embossed covers for slip resistance (R10 DIN 51130) and high load-bearing capacity, allowing foot traffic over the trays . They are modular, cost-effective, and suitable for indoor industrial e...
