

Household Eight-Circuit Distribution Box

Article Overview

An 8-circuit household distribution box safely organizes and protects up to 8 electrical circuits, supporting MCBs, RCDs, and other protective devices for residential or light commercial use.

Key Features

Circuit Capacity: Designed to accommodate 8 circuits, typically in a single-row layout, allowing for organized distribution of power to multiple household circuits ().
Protection Devices: Compatible with Miniature Circuit Breakers (MCBs), Residual Current Devices (RCDs), RCBOs, fuses, and surge protective devices (SPDs), providing overload, short-circuit, and fault protection ().
Material and Durability: Commonly made from ABS, PC, or powder-coated metal, offering impact resistance, corrosion protection, and high-temperature tolerance. Some models are IP65 rated, making them suitable for indoor and outdoor installations ().
Mounting and Installation: Many 8-way boxes include DIN rails for easy mounting of modular devices, pre-punched knockouts for cable entry, and lockable hinged covers for safety and accessibility ().
Dimensions: Typical sizes range around 183×170×95 mm to 200×155×92 mm, compact enough for wall mounting without occupying excessive space ().
Safety and Standards: Designed to meet international standards such as IEC 60529 (IP rating), IEC 60898, IEC 61008/61009, ensuring reliable protection and compliance with electrical codes ().
