

How is the Type 86 fiber optic panel

Article Overview

The Type 86 Fiber Optic Panel is a compact, standardized optical fiber distribution solution suitable for home, office, and smart network installations, supporting SC/LC interfaces and single or dual ports.

Overview

The Type 86 Fiber Optic Panel is designed for FTTR all-optical networking, smart home weak current boxes, and office network renovations. It is compatible with the standard 86 bottom box and supports both surface-mounted and concealed installation, making it versatile for various environments . Its modular design simplifies wiring, reduces installation time, and ensures long-term network stability .

Design and Features

- Port Options: Available in single-core or dual-port configurations, supporting SC, LC, and SC/APC interfaces .
- Material: Constructed from ABS/PC flame-retardant materials, providing durability and resistance to temperature variations from -40°C to +75°C .
- Structure: Features a front and back double-panel design with rounded corners, angled adapters at 45 degrees, and identification covers for easy maintenance .
- Cable Management: Optimized cable threading holes and outlet covers prevent signal attenuation and maintain neat wiring .
