

How long can optical cables be stored

Overview

Under ideal storage conditions, OPGW cables can typically be stored for about 3 to 5 years without significant degradation. However, this is just an estimate. This document does not replace the relevant rules or general or specific standards and regulations, the document contains the recommendation for the handling with the optical cables and its storage. The information applies to all types of the optical cables. Handling of various reels/drums is not important only in manufacturing facility it is important at the time of shipment to store as well as to the site for installation. Fiber Optic cable is a valuable product and it can be damaged if. This document provides the guidelines for handling and storage of Optical fiber cable drums. Allowable temperatures for storage are addressed by ICEA standards.
