

How much does a Cuban ladder-type cable tray cost

Article Overview

The price of ladder-type cable trays in Cuba generally ranges from \$2 to \$25 per meter, depending on material, type, and finish.

Price Overview

Ladder-type cable trays are available in various materials, including galvanized steel, stainless steel, aluminum, and fiberglass reinforced plastic (FRP), each affecting the cost. Galvanized steel is the most common and balances durability with affordability, while stainless steel is more expensive due to superior corrosion resistance. Aluminum trays are lightweight and rust-proof but cost more than steel, and FRP trays are chemical-resistant and lightweight, often used in high-humidity or industrial environments .

- Galvanized steel trays: Typically start around \$2-\$10 per meter for standard sizes, with hot-dip galvanization adding durability and slightly higher cost .
- Aluminum trays: Usually range from \$10-\$20 per meter due to material and workability advantages .
- Stainless steel trays: Can cost \$15-\$25 per meter, offering maximum corrosion resistance for harsh environments .
- FRP trays: Prices vary widely but are generally in the \$8-\$20 per meter range, depending on chemical resistance and load capacity .
