

How much does a finished distribution box cost

Article Overview

The price of a finished distribution box ranges from around \$10 for basic residential plastic units to over \$2,000 for industrial-grade, fully equipped boxes with advanced features.

Residential Distribution Boxes

For home use, plastic or small steel distribution boxes typically cost between \$10 and \$40 depending on size, material, and brand . These units usually include basic circuit breakers and are suitable for single-phase systems. Aluminum or higher-grade steel enclosures with better protection ratings (e.g., IP65 waterproof) may cost slightly more .

Commercial and Industrial Distribution Boxes

Commercial and industrial boxes are larger, more durable, and often include three-phase systems, multiple circuits, and advanced safety features. Prices for these units generally range from \$200 to \$2,000 or more, depending on the material (ABS plastic, powder-coated steel, or stainless steel), internal components, and additional features like surge protection, busbars, or smart monitoring . Stainless steel boxes are recommended for corrosive environments such as coastal areas or chemical plants .
