

How much does a single-mode fiber optic core cost

Article Overview

The cost of a single-mode fiber optic core typically ranges from \$0.10 to \$0.50 per foot, depending on cable type, construction, and features.

Pricing Overview

Single-mode fiber optic cables feature a narrow glass core, usually around 8–10 microns in diameter, allowing light to travel in a single path for long-distance, high-speed transmission . The price per foot varies widely based on several factors:

- Bulk cable: \$0.10–\$0.50 per foot for a single-mode fiber strand .
- Pre-terminated assemblies or patch cables: Higher costs due to factory termination and connector type.
- Armored or plenum-rated cables: \$0.50–\$5 per foot, offering protection against physical damage or fire hazards .
- High-core-count cables: For example, a 288-strand backbone cable can cost \$6 per foot or more .

Factors Affecting Cost

- Construction Type: Indoor riser-rated, plenum-rated, or armored cables differ in material and design, impacting price .
- Application: Indoor, outdoor, or direct burial installations require different cable specifications. Outdoor or UV-resistant cables are more expensive.
- Core Count: Single-core cables are cheaper, while multi-core configurations (e.g.,...
