

How much does an SC12 core pigtail cost

Article Overview

A 12-core SC fiber optic pigtail typically costs between \$15 and \$50 per unit, depending on fiber type, connector type, length, and supplier.

Price Range and Factors

The cost of a 12-core SC pigtail varies based on several factors:

- **Connector Type:** SC/UPC pigtails are generally less expensive than SC/APC due to lower manufacturing complexity and slightly higher insertion loss tolerance .
- **Fiber Type:** OS2 single-mode fibers, including bend-insensitive G.657A1 or G.657A2, may increase the price slightly compared to standard G.652.D fibers .
- **Length:** Standard lengths range from 1.5 meters to 3 meters; longer pigtails cost more due to additional fiber and jacket material .
- **Bulk Orders:** Wholesale or OEM purchases can significantly reduce per-unit cost, especially for ISPs or telecom operators sourcing large quantities .
- **Testing and Certification:** Pigtails tested for insertion loss, return loss, and compliance with RoHS, CE, or ISO9001 standards may carry a premium .

Typical Applications

12-core SC pigtails are widely used in:

- FTTH and PON networks for last-mile connectivity
- Data centers for high-density fiber splicing
- Telecom and WDM/DWDM systems for backbone and distribution networks...
