

How much does it cost to assemble a household electrical distribution box

Article Overview

Assembling a household electrical distribution box typically costs between \$150 and \$2,500, depending on the type, size, and installation complexity.

Material Costs

The cost of the distribution box itself varies widely based on material, size, and features. Basic plastic boxes for simple residential wiring can cost \$5–\$50, while metal or weatherproof boxes designed for outdoor or heavy-duty use may be more expensive. Larger boxes that accommodate more circuits or advanced features, such as smart monitoring or load management, can increase the price further.

Installation Costs

Labor is a significant portion of the total cost. Hiring a licensed electrician typically costs \$75–\$120 per hour, with total labor hours ranging from 2–18 hours depending on the complexity of the installation, panel type, and whether rewiring or upgrades are required. For a standard indoor 100–125A panel, total installation costs including materials usually run \$1,200–\$2,500, while a 200A outdoor upgrade with a new meter socket can reach \$3,000–\$6,000.

Factors Affecting Total Cost

- Panel amperage and capacity: Higher amperage panels cost more...
