

How much does it cost to repair a relay protection device

Overview

The repair cost can range from \$20 for a DIY approach to \$300 if you hire a professional. Hiring a professional technician costs you between \$75 to \$150 per hour, and the entire replacement process usually takes one to two hours. The cost to repair your damaged item can vary greatly based on a number of factors including: complexity of the electronic item; extent of damage; cost and availability of key components that might need to be replaced; whether there have been previous repair attempts; and the overall condition and. Here are a few things that help to set AES apart: A quality relay repair or replacement does take some time to complete, but we'll also work to get it done for you FAST! We offer a quick standard turnaround time of 8-10 business days for most projects, but we can also deliver a RUSH turnaround time. Determining the cost to repair or replace a faulty relay depends on several factors. Testing & Calibration What is a Relay?

A relay is an electromagnetic switch. Sertec Protective Relay Services buys and sells protective relays and specializes in extending the life of obsolete electromechanical protective relays by providing quality repair, remanufacture and retrofit services for relays of all types and manufacture. We also service specialty electronics. When evaluating the cost-effectiveness of repairing versus replacing a relay, several key factors should be considered. These repairs can be performed quickly and. The average cost to hire an electrician to install or repair light fixtures, outlets, switches, or fans ranges from \$141 to \$419 with homeowners spending \$280 on average.
