

How much does the iron core of an optical cable cost

Article Overview

Iron-core or armored fiber optic cables typically cost between \$0.50 and \$13.50 per foot, depending on specifications and installation requirements.

Material Costs

The price of reinforced or iron-core fiber optic cables varies widely based on fiber type, core count, and construction. Single-mode cables generally cost \$0.50–\$3.00 per foot, while multimode cables range from \$1.50–\$6.00 per foot for standard armored or reinforced designs. Highly specialized armored cables for harsh environments or direct burial can reach \$10–\$13.50 per foot. Bulk purchases often reduce the unit cost by 20–30%, especially when buying directly from manufacturers.

Factors Affecting Price

- **Fiber Type and Count:** Single-mode fibers are cheaper per foot than multimode fibers. Higher strand counts increase costs proportionally, e.g., a 12-strand cable costs less than a 24-strand cable.
- **Core Material:** Iron-core or metallic reinforcement adds durability but increases material costs compared to standard glass-core cables.
- **Jacket and Armor:** Armored cables with flame-retardant or LSZH jackets are more expensive, particularly for outdoor or underground installations.
- **Installation Method:** Underground installation is costlier than aerial or indoor runs, adding \$10–\$27 per foot for underground versus \$5–\$14 per foot for aerial deployment...
