

How to install a door on a distribution box

Article Overview

Attach the door to the distribution box using properly aligned hinges, ensuring it opens smoothly and protects the internal components.

Step 1: Measure and Prepare the Door

Measure the height and width of the distribution box and add a small clearance (typically 1 inch) to ensure the door fits without obstruction. Choose a material suitable for the environment: steel for durability in industrial or outdoor settings, or plastic for indoor use. Cut the door to size if necessary, ensuring smooth edges to prevent injury or interference with wiring.

Step 2: Select and Attach Hinges

Use medium-duty hinges appropriate for the door's weight. Position the hinges along one vertical edge of the door, typically the left side, and attach them using screws that match the door material. Ensure the hinges are aligned so the door swings freely without binding. For heavier doors, consider using two or more hinges for stability.

Step 3: Mount the Door to the Box

Align the door with the distribution box, keeping the clearance consistent around the edges. Secure the hinges to the box using screws or bolts, depending on the enclos...
