

How to make a vertical downward bend in a mesh cable tray

Overview

Cut wires with B-Line Angular Bolt Cutter, bend to create a bend, tee, or reducer. The Offset Blade Cutter produces a clean cut. This video shows you how easily, you can form and bend a wire mesh cable tray from Siltec - suitable for cables and tubes. Elbow joint RVS can be used to change a cable tray's horizontal orientation with a range of -90° – $+90^{\circ}$. You can now download the new Installation Guide for Rejiband[®] wire mesh cable tray: a new online resource to help installers, through illustrations, that shows, step by step, how to install. Depends on the type of cable tray, you can buy 90° tray fittings or use a speed square with a straight edge and a grinder or skill saw to cut 45° cuts. Protect sensitive cabling from dust or damage, particularly in exposed or industrial areas.
