

How to remove cable tray cover plates

LoRa handheld portable base station

Article Overview

To safely remove a cable tray cover plate, first ensure power is disconnected, then loosen or remove the securing hardware while supporting the cover to prevent damage or injury.

Safety First

Before attempting removal, disconnect power to all cables in the tray and verify with a voltage tester to ensure no live electricity is present. Clear the surrounding area of flammable materials and ensure proper personal protective equipment (PPE) is worn, including gloves and eye protection, especially if working at height or with metal covers .

Identify the Cover Type and Fasteners

Cable tray covers can be solid, ventilated, or aluminum, and may be secured with screws, bolts, or self-tapping fasteners . Inspect the cover to determine the type of hardware used. For aluminum or metal covers, carriage bolts or serrated flanged nuts are common, while some covers use 1/4-20 nylon lock nuts or self-tapping screws .

Step-by-Step Removal

- **Support the Cover:** Use a helper or temporary supports to hold the cover in place while loosening fasteners to prevent it from falling .
- **Loosen Fasteners:** Using the appropriate tool (screwdriver, wrench, or socket), carefully loosen all screws or bolts along the cover edges. For self-tapping screws, a power drill with the correct bit may be used....
