

How to start the fiber optic cable

Article Overview

To turn on a fiber optic cable, you need to power up the Optical Network Terminal (ONT) and connect it properly to your router, ensuring all cables are securely in place.

Step 1: Gather Equipment

You will need a fiber optic modem or ONT (provided by your ISP), a compatible router with a WAN or fiber port, the fiber optic cable itself, an Ethernet cable, and power adapters for both the ONT and router .

Step 2: Connect the Fiber Cable to the ONT

Locate the fiber optic wall outlet where the ISP's line enters your home. Remove any protective caps from the fiber cable and the ONT port. Align the connector carefully and insert it until it clicks securely . Handle the fiber connector by its plastic housing to avoid damage.

Step 3: Power On the ONT

Plug in the ONT's power adapter and wait for the status lights to stabilize, which may take 2–5 minutes. A solid green Power light indicates the device is receiving electricity, and a solid green or blue PON/Optical light confirms a successful connection to the fiber network.

Step 4: Connect the ONT to Your Router...
