

Inquiry about pricing for electrical distribution boxes at Haiti construction site

Article Overview

Electrical distribution boxes for construction sites in Haiti typically range from \$150 to \$600 USD depending on capacity, features, and weatherproofing.

Price Overview

The cost of a distribution box depends on several factors including voltage rating, amperage capacity, number of circuits, material, and protective features. Standard commercial or construction-grade boxes with 60A input, multiple branch breakers, and waterproof enclosures generally fall in the \$150-\$600 USD range for units similar to those available on Amazon and other suppliers . Outdoor-rated boxes with IP54-IP65 protection or corrosion-resistant materials command higher prices due to durability in harsh environments .

Features Affecting Cost

- **Amperage and Voltage:** Higher capacity boxes (e.g., 100A or three-phase systems) cost more than single-phase 60A units .
- **Weatherproofing:** Boxes designed for outdoor construction sites with waterproof and dustproof ratings (IP54-IP65) are more expensive .
- **Integrated Safety Devices:** Inclusion of circuit breakers, leakage protection, and surge protection increases upfront cost but enhances safety
