

Installation Scheme for Four-Port Information Panel Armor in Mali

Article Overview

Install the four-port information panel armor by mounting securely, connecting each port with approved patch cables, configuring IP settings, and verifying connectivity with the central monitoring system.

Panel Mounting and Preparation

- Select a secure location: Ensure the panel is mounted in a stable rack or cabinet, protected from environmental hazards and unauthorized access. The panel should be easily accessible for maintenance and monitoring .
- Check supplied components: Confirm that all necessary items are included, such as stuffer caps, rear cable managers, cable ties, and power supply .
- Safety precautions: Follow all electrical safety guidelines, including PPE for shock or arc flash hazards, and ensure the power is off during installation .

Cabling and Connections

- Use approved cables: For control bus connections, use shielded Category 5e, 24 AWG solid cables. Avoid UTP or stranded shielded cables .
- Terminate cables properly: Use the T568A wiring scheme for all RJ45 terminations. Test each cable for continuity before installation .
- Connect ports: Each of the four ports on the panel should be connected to the corresponding ports on the Master Control Panel (MCP) or Distribution Control Panel (DCP). Panels can be daisy-chained if required, but ensure the OUT port of the last panel in a group connects to the next group's OUT port .
- Maximum cable length: Maintain a maximum patch cable or fiber jumper length o...
