

Intelligent Distribution Box Organization Solution

Overview

Based on the MV and LV intelligent equipment and distribution master station system, the modeling of MV and LV equipment and automatic generation of geographical layout and electrical wiring diagram are realized through IoT technology and full-automatic cloud-edge collaboration. Based on the MV and LV intelligent equipment and distribution master station system, the modeling of MV and LV equipment and automatic generation of geographical layout and electrical wiring diagram are realized through IoT technology and full-automatic cloud-edge collaboration. Digital technologies such as Cloud Computing, Big Data, Internet of Things (IoT), Artificial Intelligence (AI) and Industry 4.0 are phenomenon which are changing the world we are living in. To answer the most demanding market. Huawei's Intelligent Power Distribution Solution contributes to the implementation of transparent sensing of power distribution transformer districts and the enhancement of intelligent service capabilities, providing users with a greener, more stable and safer power consumption experience. Intelligent power distribution box is composed of traditional leakage protector, air switch, AC contactor and KC868-H8. From consulting services to engineering design and construction, to long-term project maintenance, CHINT is willing to work with customers to achieve value.
