

Intelligent Fiber Optic OTDR Tester

Overview

Dimension's versatile OTDR fiber optic tester helps field technicians reliably and cost-effectively install, turn on, troubleshoot, and monitor any optical network architecture. It can provide high-precision measurement of fiber optic parameters, including fiber length, attenuation coefficient, fault location, etc., to help users accurately understand the condition of fiber optic networks. By detecting reflected signals in optical fibers, OTDR can quickly locate fault. HTF's high-precision OTDR is a state-of-the-art instrument that integrates measurement, analysis, monitoring, and diagnostics. Hicloud BD8000 otdr machine are used to measure the fiber and cable length, loss, connection quality. VIAVI provides the widest range of OTDR testing tools delivering everything from basic fiber certification to fully automated bidirectional OTDR testing that scales for multi-fiber cable certification. Manufactures custom cable assemblies - harsh environment specialists.
