

Is there any fiber optic communication near Switzerland

Article Overview

Fiber optic networks are widely available in Switzerland, with coverage expanding rapidly and multiple providers offering high-speed FTTH connections.

Current Coverage and Providers

Switzerland has a growing fiber optic infrastructure, with FTTH (Fiber to the Home) coverage reaching around 50% of households in 2024, and plans to increase this to 57% by 2025 and 75–80% by 2030 . Major providers include Swisscom, Sunrise, Salt, Init7, and smaller operators like Green, Quickline, and Teleboy, offering speeds up to 25,000 Mbps in some areas . Swisscom alone is investing heavily, aiming to connect almost the entire population by 2035 .

Local Networks and Expansion

Several local networks are operated by companies such as Swiss4net, which manages at least eight local optical fiber networks in cities like Morges, Pully, Chiasso, Ascona, Baden, and Wettingen . These networks allow service providers without their own infrastructure to offer FTTH services nationwide. The number of domestic fiber-optic contracts is increasing, with around 1.4 million connections, representing 32% of total broadband connections in Switzerland as of 2024 .
