

# Italian Home Electrical Distribution Box Specifications and Dimensions

## Article Overview

Italian home electrical distribution boxes are designed according to CEI standards, available in various sizes and types, typically accommodating 6 to 42 circuits for residential use.

### Types of Italian Electrical Boxes

1. **Flush-Mounted Boxes:** Installed within walls for a clean, seamless finish, commonly used in modern Italian homes. These boxes are designed to fit standard Italian faceplate footprints and are ideal for switches, sockets, and small breaker panels .
2. **Surface-Mounted Boxes:** Attached directly to walls, suitable for retrofit applications or where wall recessing is not possible. They often include snap-in jack blanks for unused ports .
3. **Outdoor/Weatherproof Boxes:** Engineered for high-moisture or outdoor environments, these boxes protect electrical components from rain and dust, often rated IP44 or higher .
4. **Shallow or Pancake Boxes:** Ultra-thin boxes for installations with limited wall depth, commonly used in plasterboard walls .
