

Lao Laos lays some fiber optic cables

Article Overview

Laos has laid over 98,500 kilometers of fiber optic cables, connecting 97% of villages nationwide and establishing 18 cross-border transmission lines.

National Fiber Optic Expansion

In 2023, Laos completed the installation of 98,524 kilometers of fiber optic cable, significantly extending mobile and internet coverage to remote areas across all 18 provinces, reaching 8,245 villages and covering 97% of villages nationwide . This expansion supports over 6.1 million registered mobile numbers and 4.6 million internet users, with most accessing 3G and 4G services, while 5G networks have been introduced in Vientiane, Luang Prabang, and Bokeo provinces . The rollout has enhanced connectivity for both residents and businesses, enabling digital services and economic growth.

Cross-Border Connectivity

Laos operates 18 international transmission lines linking the country with Thailand, Vietnam, Cambodia, Myanmar, and China, strengthening regional digital integration and economic ties . These cross-border links position Laos as a digital land-link, improving data exchange and supporting international telecommunications traffic.
