

Lebanon ST Adapter Upgrade Version

Overview

STSW-LINK007 is the firmware upgrade application for ST-LINK, ST-LINK/V2, ST-LINK/V2-1, and STLINK-V3 boards through the USB port. For more details refer to the release note Firmware On ST-LINK/V2 boards, upgrade firmware to the version V2J23S4. This firmware makes the ST-LINK on-board compatible with J-Link OB, allowing users to take advantage of most J-Link features like the ultra fast flash download and debugging speed or the free-to-use. To update the firmware of ST-LINK boards, ST offers three applications: STM32CubeProgrammer (STM32CubeProg) is an all-in-one multi-OS software tool for programming STM32 products. In this document, ST-LINK is a generic name that refers to the different implementations of a debugger/programmer probe interface for STMicroelectronics microcontrollers.

Article Content

Overview of ST-LINK derivatives

The several ST-LINK coexisting versions result from the incremental addition of new functionalities over time, starting from the first ST-LINK/V1 version. This section presents a brief history of the
