

Level 3 Temporary Power Distribution Box refers to

Article Overview

A Level 3 Temporary Power Distribution Box is a portable, rugged, and weather-resistant unit designed for safe, flexible power distribution in temporary indoor or outdoor applications.

Overview

A Level 3 Temporary Power Distribution Box is engineered to provide reliable electrical distribution for temporary setups such as construction sites, live events, industrial projects, or emergency power situations. These units are typically portable, compact, and durable, allowing for easy transport, setup, and storage while maintaining safety and compliance with electrical standards (Lex Products) .

Key Features

- **Amperage and Voltage Ratings:** Available in a wide range, from 20A to 800A, with options for single-phase or three-phase power. Some models feature adjustable circuit breakers to match specific load requirements (Lex Products) .
- **Environmental Protection:** Many Level 3 boxes are rated NEMA 3R, providing protection against rain, sleet, snow, and falling dirt, making them suitable for outdoor use. Indoor models may have NEMA 1 ratings (Lex Products) .
- **Safety Compliance:** Units are cULus listed to UL 1640 standards, ensuring protection against electrical hazards. Features may include GFCI protection, overcurrent protection, and reverse phase/neutral safeguards (Southwire)
