

Low-voltage intelligent distribution cabinet price details

Article Overview

The price of low-voltage intelligent distribution cabinets varies widely, typically ranging from a few hundred to several thousand USD per unit, depending on type, specifications, and intelligent features.

Pricing Overview

Low-voltage intelligent distribution cabinets are available in fixed type (e.g., GGD, GHK series) and drawer type (e.g., GCK, GCS, MNS series). Fixed cabinets are simpler and lower cost, suitable for small distribution points, while drawer-type cabinets are modular, easier to maintain, and used in high-reliability environments like data centers and smart factories . Indicative pricing depends on several factors:

- Cabinet type and size: Fixed cabinets are generally cheaper, while modular or drawer-type cabinets with higher rated currents cost more .
- Rated current and voltage: Cabinets supporting higher currents (up to 6300A) or voltages (up to 690V) are more expensive .
- Intelligent features: Integration of monitoring units, remote control, fault detection, and IoT sensors increases cost .
- Protection level (IP rating): Cabinets with higher protection (IP54 or above) for industrial environments are priced higher .
- Customization and OEM requirements: Custom busbar layouts, explosion-proof designs, photovoltaic-specific cabinets, or branded enclosures affect pricing .
- Order volume: Wholesale or bulk orders reduce per-unit cost, while single or small...
