

Making small electrical distribution boxes in Afghanistan

Article Overview

Small electrical distribution boxes can be manufactured locally in Afghanistan by leveraging existing companies, imported components, and adherence to international standards.

Local Manufacturing Options

Afghanistan's domestic manufacturing industry for electrical equipment is still developing, but there are companies capable of producing distribution boxes and related electrical panels. For example, Rayan Manufacturing Company produces electrical panels, meter boxes, and cable trays using modern machinery and CNC equipment, following UL and IEC international standards . Similarly, Amash Electricity Services Company provides design, execution, and maintenance of power distribution solutions, including small-scale distribution infrastructure . Partnering with such companies can help ensure quality and compliance.

Material Sourcing

Most electrical components, such as low-voltage circuit breakers, switches, and enclosures, are still largely imported, with Chinese suppliers dominating the market due to cost-effectiveness . For small distribution boxes, you can source:

- Metal or plastic enclosures suitable for indoor or outdoor use
- Busbars, terminals, and wiring accessories...
