

Maldivive Waterproof Connector Box with Anti-Static Properties

Article Overview

IP65/IP66 waterproof junction boxes with anti-static properties are available in the Maldives for both indoor and outdoor electrical applications.

Product Features

Material and Durability: Many waterproof connector boxes are made from high-quality PA757 ABS plastic or glass-fiber reinforced polyester, offering high hardness, impact resistance, and corrosion resistance. These materials ensure long-term durability in harsh environments, including exposure to moisture and seawater . **Waterproof and Dustproof Ratings:** Boxes typically meet IP65, IP66, or IP68 standards, providing protection against dust ingress and water jets or even temporary immersion. Some products, like the WAGO Gelbox, offer IPX8 protection, ensuring continuous immersion protection at the connection points without permanently encapsulating the box . **Anti-Static Properties:** Anti-static features are achieved through electrostatic spray coatings or material selection, preventing static buildup that could damage sensitive electronics . This is particularly important for industrial or outdoor applications where static discharge could compromise safety or equipment performance. **Design and Installation:** Many boxes come with mounting tabs, screw-on lids, and DIN rail compatibility, facilitating easy installation. Some models include see-through lids, internal earthing, and secure locking mechanisms to prevent unauthorized access . **Applications:** These boxes are suitable for electronics projects, power protection, industrial control, and outdoor installations. They can house terminal strips, splicing connectors, or other electrical components while maintainin...
