

Mauritius Electricity Supply

Overview

The Central Electricity Board (CEB), a government-owned entity in Mauritius under the Ministry of Energy and Public Utilities, established by the CEB Act of 1963, manages the generation, transmission, distribution, and sale of electricity across the country. Mauritius's power sector has experienced steady growth in demand over the past two decades, prompting continuous expansion of electricity generation capacity. This report provides a comprehensive analysis of electricity production capacity versus consumption in Mauritius from 2005 to 2025, using Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country. All data refer. Mauritius's energy sector is undergoing a significant transformation, driven by the country's ambition to reduce its heavy reliance on imported fossil fuels and transition toward renewable energy sources. Established in 1952 and empowered by the Central Electricity Board Act 1963, the CEB's business is to "prepare and carry. of Mauritius was higher at 508. As at end May 2024, Interconnection Agree gh level of investment requir ple and the environment against the harmful effects of ona radiation safety infrastructure.
