

Mobile Fiber Optic Cable Plus Router Huawei

Article Overview

Huawei offers both home fiber-to-the-room (FTTR) solutions and mobile Wi-Fi routers that enable high-speed internet access via fiber or cellular networks.

Huawei FTTR Home Solutions

Huawei's FTTR (Fiber To The Room) technology extends fiber optic connectivity directly into individual rooms, providing stable Gigabit Wi-Fi 6 coverage throughout the home . The system includes master and slave FTTR units, optical components, and routing tools for fiber cables. Users benefit from high bandwidth, low latency, and support for multiple simultaneous devices, making it ideal for streaming, online education, gaming, and home office setups. The solution also integrates with Huawei's LinkHome app for real-time network monitoring and parental controls .

Huawei Fiber Optic Routers

Huawei offers fiber optic routers capable of ultrafast internet speeds up to 4 Gbps with Wi-Fi 6 technology . These routers feature multiple dual-band antennas for strong signal coverage, suitable for dense urban environments. They support Ethernet, SDH/SONET, and 4G/5G broadband, and can function as smart home hubs with voice assistant integration. High-capacity models like the OSN 1800 and OSN 1500 provide flexible service configurations for both home and enterprise networks .
